GENesis: A General Knowledge Quiz

GENesis is a general knowledge quiz that tests both what you know and how you think, spanning science and technology, history, geography, sport, business, current affairs, but also test your critical thinking and reasoning. Teams start with a fast-paced, timed round where quicker answers earn more points, then move on to a mix of formats including Connect, logic puzzles and Closest Wins. Bring your team, your sharpest minds and your best guesses!

Topics Covered:

- Science and technology
- History
- Geography
- Sport
- Business and economics
- Current affairs
- The UAE and the region
- Logic and reasoning

The event will be conducted in **multiple stages.**

The first set consists of a time-based round where teams must answer as soon as possible to receive more points. This segment will be the majority of the questions.

Every question will be answered within a specified time limit by every team, and points will be accumulated throughout the segment.

The second segment will consist of

1. Recall Quiz – Teams answer questions about a variety of topics.
2. Connect - Clues are revealed one at a time, and the earlier a team identifies the link, the more they score.
3. Logic Grid - All teams solve the same puzzles at the same time, against the clock.
4. Closest Wins - Numeric questions where no team is expected to know the exact figure, so being close is what counts.

In the event that the number of registered teams exceeds a certain limit, Segment 1 will become an elimination round.
